

EMMANUEL NWOSU

Software Engineer | Full – Stack Engineer

Aba, Abia State, Nigeria

+234 7082107715 | nwosuemanuel159@gmail.com

GitHub: github.com/nwoemma | LinkedIn: linkedin.com/in/

PROFESSIONAL SUMMARY

Software Engineer with **5 years of software development experience beginning in 2021**, with a strong focus on backend and full-stack development. Experienced in building RESTful APIs, database-driven applications, business logic, authentication and authorization systems, frontend integrations, and software features for real-world projects.

Strong proficiency in **Python, Django, Django REST Framework, PostgreSQL, React, JavaScript, and TypeScript**, with additional experience in Flutter/Dart and Python-based machine learning.

Experienced across the software development lifecycle, including requirements analysis, development, database design, API development, frontend/backend integration, testing, debugging, deployment, and application maintenance.

A practical problem solver who can work independently or collaboratively, learn new technologies, investigate technical issues, and develop maintainable solutions.

PROFESSIONAL EXPERIENCE

SKILICOLONY — Port Harcourt, Rivers State, Nigeria

Backend Engineer | 2026 – Present

Project: Skileman

Working on a full-stack software platform involving backend services, business logic, authentication, database management, and application workflows.

- Develop backend services using Python, Django, and Django REST Framework.
- Design and implement REST APIs for application functionality and frontend integration.
- Design and manage PostgreSQL database structures and relationships.
- Implement authentication, authorization, role-based access control, and permissions.
- Develop business logic involving users, wallets, notifications, and onboarding.
- Use Django signals to support application workflows and maintain data consistency.
- Implement security-related functionality including rate limiting and audit logging.
- Investigate and resolve application issues and bugs.
- Work across backend and frontend components to deliver complete features.
- Use Git and GitHub throughout development.

RICKS DEVELOPMENT — Calabar, Cross River State, Nigeria

Frontend Engineer Intern | 2025 | Remote

Worked remotely on software projects involving frontend development, backend functionality, machine learning, and business applications.

Projects: Obodo, Bitmonie, Billway & Machine Learning Project

- Contributed to frontend and application development based on project requirements.
- Developed responsive frontend interfaces and reusable components.
- Worked on backend functionality and API-related features where required.
- Implemented application business logic and database-driven functionality.
- Investigated bugs and contributed to software improvements.
- Developed Python-based machine learning functionality.
- Worked with text processing, feature extraction, and machine learning models.
- Collaborated remotely with the development team.

ASHPOT TECHNOLOGIES — Aba, Abia State, Nigeria

Junior Backend Developer | 2022 – 2024

Started at Ashpot as an intern and progressed into junior backend development, contributing to business software solutions.

Projects: Earlystart & Billvenv

- Developed backend applications using Python and Django.
- Designed and implemented RESTful APIs using Django REST Framework.
- Designed database models and relationships for application requirements.
- Developed business logic and application workflows.
- Integrated backend services with frontend applications.
- Implemented authentication and authorization functionality.
- Investigated and resolved application bugs and technical issues.
- Maintained existing software and implemented new features.
- Tested application functionality and resolved development issues.
- Used Git and GitHub for version control.
- Translated business and technical requirements into functional software solutions.

DEVELOPMENT FOUNDATION

2021 — Frontend Development & Self-Learning

Began software development through independent learning and practical frontend development.

- Learned HTML, CSS, and JavaScript.
 - Used online programming resources including GeeksforGeeks.
 - Built foundational knowledge of web development and frontend programming.
 - Progressed from frontend development into professional backend engineering.
-

PROJECTS

SKILEMAN

Full-Stack Software Platform | Skilicolomy

Technologies: Python, Django, Django REST Framework, PostgreSQL

- Backend API development
- Authentication and authorization
- Role-based access control
- Wallet functionality
- Notifications
- User onboarding
- Database design
- Business logic
- Audit logging
- Rate limiting
- Frontend/backend integration

BILLVENV

Business Management Software | Ashpot Technologies

Technologies: Python, Django, Django REST Framework

- Backend development
- REST API development
- Database-driven functionality
- Business logic
- Application maintenance
- Feature development
- Debugging and testing

EARLYSTART

Web Application Project | Ashpot Technologies

- Developed web application functionality.
- Worked with Python and Django.
- Implemented backend functionality and business logic.
- Worked with databases and application workflows.
- Participated in testing, debugging, and feature development.

WELDORK

Full-Stack Web Application | Personal Project

Technologies: Django, Django REST Framework, React, PostgreSQL

- Developed REST APIs and backend functionality.
- Implemented user roles and permissions.

- Developed frontend functionality using React.
- Integrated frontend and backend services.
- Worked with PostgreSQL.
- Deployed application components to cloud platforms.

OBODO

Backend Development | Ricks Development

Technologies: Python, Django, REST APIs

- Developed backend functionality.
- Implemented application logic and API services.
- Worked with database-driven features.
- Contributed to application development remotely.

BITMONIE

Frontend Landing Page | Ricks Development

Technologies: React, JavaScript, TypeScript

- Developed a responsive landing-page interface.
- Built reusable frontend components.
- Implemented user-facing layouts and functionality.

BILLWAY

Software Development Project | Ricks Development

- Contributed to application functionality and feature development.
- Worked on debugging and software improvements.
- Implemented requirements provided by the project team.

MACHINE LEARNING CHATBOT

Personal/Project Development

Technologies: Python, Scikit-learn, TF-IDF, Logistic Regression

- Developed a machine-learning-based chatbot.
- Implemented text preprocessing and feature extraction.
- Used TF-IDF for text representation.
- Implemented Logistic Regression for classification.
- Developed application logic for processing user queries.

TECHNICAL SKILLS

Backend & API Development

Python • Django • Django REST Framework • REST APIs • API Integration • Backend Engineering • Business Logic Development • Authentication & Authorization

Frontend Development

React • JavaScript • TypeScript • HTML5 • CSS3 • Tailwind CSS • Vite

Databases

PostgreSQL • MySQL • SQLite • Database Design & Management

Software Engineering

Software Architecture • System Design • Software Maintenance • Debugging & Troubleshooting • Testing • Test-Driven Development (TDD) • Technical Problem Solving • Version Control

Security & Application Development

Role-Based Access Control • Application Security • Permissions • Rate Limiting • Audit Logging

Machine Learning

Python • Scikit-learn • TF-IDF • Logistic Regression • Machine Learning

Mobile Development

Dart • Flutter

Cloud & Development Tools

Git • GitHub • Linux • AWS • Render • Vercel

PROFESSIONAL STRENGTHS

Problem Solving

Able to analyse technical and business problems, identify practical solutions, and implement them effectively.

Software Engineering

Experienced in taking software features from requirements and design through development, testing, debugging, and deployment.

Adaptability

Comfortable learning new technologies and working across different projects and development environments.

Collaboration

Experienced working with developers, business stakeholders, and remote project teams.

Software Maintenance

Capable of understanding existing codebases, identifying issues, improving functionality, and maintaining software over time.

Independent Work

Able to take responsibility for development tasks, investigate problems, and deliver solutions with minimal supervision.

EDUCATION

CLIFFORD UNIVERSITY

Abia State, Nigeria

Bachelor of Science (B.Sc.) — Computer Science
