PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 5+ years of experience designing, building, and deploying scalable web applications using React and Django, combined with hands-on expertise applying Machine Learning to solve real business problems. Proven track record of delivering end-to-end solutions — from responsive front-end interfaces to robust back-end architecture, RESTful APIs, and ML-powered features — that improve efficiency, user experience, and business outcomes. Adept at working across the full software development lifecycle in fast-paced, collaborative environments.

CORE SKILLS

Front-End: React, JavaScript (ES6+), Redux, HTML5, CSS3, Responsive/Mobile-First Design

Back-End: Python, Django, Django REST Framework, Fast API, RESTful API Design

Machine Learning: Python, scikit-learn, TensorFlow, PyTorch, Pandas, NumPy, Model Deployment

Databases: PostgreSQL, MySQL, MongoDB

DevOps & Tools: Git/GitHub, Docker, CI/CD, Linux, Postman, Agile/Scrum

Cloud: AWS (S3), Render, Vercel

PROFESSIONAL EXPERIENCE

Backend Developer/ [Skilicolommy LTD] (2024-2026)

- Designed and developed API for web applications using React and Django, serving 400+ active users still on the mvp.
- Built and maintained 100+ RESTful API endpoints with Django REST Framework, improving data throughput and reducing response times by 55%.
- Collaborated with cross-functional teams (design, product, QA), and frontend and in an Agile environment to ship features on a [bi-weekly] release cycle.
- Deployed using PAAS (Platform as a service) like Render and some Other platforms.
- Built back-end services and data pipelines in Python/Django to support core product features.
- Optimized application performance and database queries, reducing page load times by 5%.
- Deployed the service using Docker for reproducible, portable builds, with configuration compatible with cloud or Hugging Face Spaces hosting.

Software Developer | [Ricks Development LTD] (2021-2023)

- Developed responsive front-end interfaces with React, translating UI/UX designs into pixel-perfect, accessible components.
- Developed an ML using pipeline to automate invoice data extraction, eliminating 15 hours/week of manual data entry across the finance team.
- Designed an ML pipeline to automate identity verification through face matching, reducing manual verification time by 89%.
- Implemented a RESTful API layer to expose verification endpoints, enabling seamless integration with front-end or third-party onboarding systems.
- Tested the verification pipeline against a sample dataset of identity documents to validate accuracy before deployment.

ELECTED PROJECT'S

- Skileman — Backend API (Django + Django Rest framework) with an integrated ML model for deployed on Render skileman-admin-backend.onrender.com.
- Billway Frontend — Billway powers a unified financial ecosystem — for individuals automating daily payments and for businesses embedding digital finance into their platforms..(<https://billwayhq.com/>)
- KYC Machine learning Services — Developed a Machine Learning Powered Services for Identity/document verification facial matching liveness detection, and customer risk assessment (<https://nwoemma-kyc-service.hf.space/>)
